IDENTIFIERS	*Oregon

ABSTRACT

Utilizing certain guidelines and assumptions, this report presents actual, estimated, and projected enrollment for Oregon's 38 institutions of higher education between 1959 and 1978. The report is composed mostly of statistical tables presenting data on the 12 community colleges, 9 public 4-year institutions, and 17 private and independent institutions. Seminaries and Bible schools are not included. It is noted that total enrollments are expected to increase by 55% between 1968 and 1978, after an actual increase of 170% between 1959 and 1968. Between 1968 and 1973, the proportion of enrollments in community colleges will increase, while the proportion in public 4-year and independent and private instructions will decline. Between 1973 and 1978, the relative proportions will remain stable. (DS)

INTRODUCTION AND METHODOLOGY

Introduction

This report presents enrollment projections for Oregon's public, private, and independent institutions of higher education. All thirty-eight two and four-year institutions have been included. The body of the report is composed almost entirely of statistical tables presenting actual, estimated, and projected enrollment data. This form of presentation is utilized to provide data that will be useful for educational planning at both the State and institutional levels.

Since the report is designed to present summary enrollment information, highly detailed institutional data and involved descriptions of the methodology employed have been omitted.

Methodology

Enrollment projections generally represent a melding of: (1) information concerning the numbers of potential students in the geographic service area of the institution, (2) historical enrollment trends of the institution, and (3) the most insightful assessment that the forecaster can make of special circumstances likely to modify enrollment trends. Such projection techniques require that the following assumptions be made:

1. Enrollments in state supported two-year institutions are assumed to bear a linear relationship to the average daily membership in grades nine to twelve within the area legally constituting the district.

2. In-state enrollments in state supported four-year colleges and universities are functions of the number of high school graduates within the State.

3. Out-of-state enrollments in state supported four-year colleges and universities are controlled by the state and will generally retain a constant relationship to in-state enrollments.

4. Enrollments in private and independent colleges and universities are generally independent of conditions within the State and are more directly related to policies set by the various private and independent colleges and universities.

5. The student survival patterns in colleges and universities will continue to follow historical trends.

6. The basic admission patterns in state supported institutions of higher education will remain relatively stable for the next ten years.

7. The impact of wars, domestic crises, and economics will remain relatively constant for the next ten years.

8. The physical facilities and operating budgets necessary to support the enrollments projected in this report will be made available.

Because of the assumptions detailed above, the Research and Management Data Committee[1] of the Educational Coordinating Council has suggested the following guidelines for the development of coordinated statewide

---

[1]See Appendix B for committee membership.

enrollment projections. The State Department of Education, the State Department of Higher Education, and the Educational Coordinating Council have used the following guidelines in the development of the projections which appear in this report:

1. The State Department of Higher Education should maintain present procedures for enrollment projections for State four-year colleges and universities. Essential basic data, principal work sheets, and an explanation of procedures used should be forwarded to the Educational Coordinating Council's staff for review. The Council's staff will subsequently submit these to the Research and Management Data Committee for approval.

2. The State Department of Education should continue to develop appropriate procedures for enrollment projections for community colleges. Essential basic data, principal work sheets, and an explanation of procedures used should be forwarded to the Educational Coordinating Council's staff for review. The Council's staff will subsequently submit these to the Research and Management Data Committee for approval.

3. The Educational Coordinating Council's staff should develop procedures for collecting basic enrollment data and projecting enrollments in cooperation with the independent colleges. Essential basic data, principal work sheets, and an explanation of procedures used should be submitted to the Research and Management Data Committee for approval.

4. The Educational Coordinating Council's staff should integrate the enrollment projections from all three segments of higher education into a single statewide projection, and prepare this information along with enrollment projections for each segment or for each institution, as requested by the Governor, the Legislature, and the Council.

5. Enrollment projections as compiled by the Educational Coordinating Council's staff will be submitted to the Research and Management Data Committee for review and approval, and subsequently to the Council for approval prior to publication.

Projections of undergraduates for Oregon's public four-year colleges and universities and the independent colleges and universities are based on a cohort survival technique. These projections assume that the freshman class at these institutions will continue to bear the same relationship to

the previous June high school graduating class as has occurred during the past year and that the retention rate for other undergraduate classes will continue to bear the same relationship as has occurred during the past three years. The projections produced by this basic technique are modified at some independent institutions by the forecasters to take into consideration factors that influence the projections but which are not accounted for in the historically based projection technique.

Projection procedures for Oregon's community colleges are still in a process of development. Present procedures represent a cooperative effort between the State Department of Education and each community college. Our initial statewide projection assumed that each community college will achieve its potential enrollment in ten years and that the potential of any given school would be one-fourth of the average daily membership in grades nine through twelve of the area legally constituting the district. A linear projection was made for each institution using the estimated reimbursable FTE for the 1967-68 school year as a base in relation to the institution's projection potential. Because available data do not warrant projecting small differences in enrollment beyond the potential for the district, the projections are extended unchanged, once the potential enrollment is reached.

TRENDS IN COLLEGE ENROLLMENTS IN OREGON

An analysis of the summary data presented in Table 1, and graphically represented in Figures 1 and 2, reveal the following enrollment trends in Oregon's institutions of higher education:

1. Enrollments in Oregon's colleges and universities are expected to increase by 41,987 annual average FTE students or 55.8 percent during the next ten years (1968-69 to 1978-79). During the preceding ten years (1958-59 to 1968-69) the number of annual average FTE students increased by 41,281 or 169.4 percent.

2. In the next ten years, community colleges will experience a greater numerical and percentage increase in student enrollment than will the public four-year and the private and independent colleges and universities. The community colleges are expected to increase by 23,143 annual average FTE students or 128.1 percent; the public four-year colleges and universities by 15,181 annual average FTE students or 33.2 percent; and the private and independent colleges and universities by 3,663 annual average FTE students or 31.9 percent.

3. The proportion of Oregon's college enrollments provided for by the public four-year colleges and universities, and the private and independent colleges and universities will continue to decline, while the proportion provided for in the community colleges will continue to increase (as shown in columns 6, 7 and 8 in Table 1 and Figures 1 and 2).

4. The proportion of Oregon's college enrollments provided for by the three segments of higher education (community colleges, State four-year colleges and universities, and private and independent colleges and universities) will become relatively stable in the last five years of the coming decade (as shown in columns 6, 7, and 8 in Table 1 and in Figures 1 and 2).

1977-78	41,207	59,281	14,853	115,341	35.73	51.40	12.87
1978-79	41,207	60,847	15,128	117,182	35.16	51.93	12.91

Notes:

1. The community college projections include summer session and extension students enrolled in programs for which the State makes reimbursement to the colleges.
2. Public four-year and independent college and university projections do not include summer session or extension programs.
3. Independent college projections are fall term headcounts converted to estimated FTE by the average conversion as determined for the year 1967.
4. Projections do not include theological seminaries or Bible schools.

COMMUNITY COLLEGE
ENROLLMENT PROJECTIONS

The State Department of Education developed enrollment projections for community colleges. These projections were submitted to and approved by the Council's Research and Management Data Committee on January 13, 1969, and were subsequently approved by the Educational Coordinating Council, January 16, 1969.

1972-73	63,290	34,916	33,935
1973-74	67,807	37,351	36,339
1974-75	71,407	39,284	38,254
1975-76	74,623	41,010	39,973
1976-77	76,916	42,239	41,207
1977-78	76,916	42,239	41,207
1978-79	76,916	42,239	41,207

Notes:

1. The fall term headcount, column 2, includes all students who were enrolled or are projected in programs for which the State reimburses the colleges.

2. The fall term headcount projections were calculated from FTE projections in column 3, using the historical relationship between headcount and FTE in each institution.

3. The fall term FTE, column 3, includes all Oregon residents enrolled or projected in programs for which the State reimburses the colleges.

4. The average term FTE incorporates all students for which the State reimburses the colleges, including summer session and extension students.

STATE DEPARTMENT OF HIGHER EDUCATION
ENROLLMENT PROJECTIONS

The Office of Institutional Research and the State Department of Higher Education developed enrollment projections for public four-year colleges and universities. These projections were submitted to and approved by the Council's Research and Management Data Committee on January 13, 1969, and were subsequently approved by the Educational Coordinating Council January 16, 1969.

PRIVATE AND INDEPENDENT COLLEGE AND UNIVERSITY ENROLLMENT PROJECTIONS

The Educational Coordinating Council staff developed enrollment projections for private and independent colleges and universities. These projections were submitted to and approved by the Council's Research and Management Data Committee on February 26, 1969, and were subsequently approved by the Educational Coordinating Council, March 6, 1969.

APPENDIX B

Educational Coordinating Council's
COMMITTEE ON RESEARCH AND MANAGEMENT DATA

MEMBERS

Mr. Guy Lutz, Chairman
Assistant Director
Institutional Research
State Dept. of Higher Ed.

Mr. Robert Wilkin, Vice Chairman
Registrar
Lewis and Clark College

Mr. Harvey Crim
Business Manager
Southwestern Oregon
Community College

Mr. Don Gilles
Director, Planning &
Special Projects
State Dept. of Education

Dr. John Hakanson
Acting President
Clackamas Community College

Mr. Sig Hanson
Business Manager
Judson Baptist College

Mr. W. T. Lemman, Jr.
Director, Business Affairs
Portland State University

Mr. Donald Lewis
Assoc. Prof. of Business
Southern Oregon College

Mr. Myron Mickey
Director of Admissions
Mt. Hood Community College

Mr. Francis Morgan
Acting Director
Institutional Research
University of Portland

Mr. Jack Morton
Dean of Students
Oregon College of Education

Mr. Lloyd Thomas
Research Divison
State Dept. of Education

Mr. Richard Yocom
Registrar
Willamette University

EX-OFFICIO CONSULTANTS

Mr. R. L. Collins, Secretary
State Board of Higher Ed.

Mr. Richard Pizzo, Director
High School-College Relations
Council
University of Oregon

Mr. Fred Segrest, Analyst
State Department of Finance

Dr. Donald K. Shelton
Executive Secretary
Oregon Community College Assn.

Mr. Robert Smith
Assistant Administrator
State Department of Finance

Mr. Robert Stevens, Analyst
Legislative Fiscal Committee

Mr. Lowry Bennett
Director, OTIS
Eugene, Oregon
